01 Problem solving

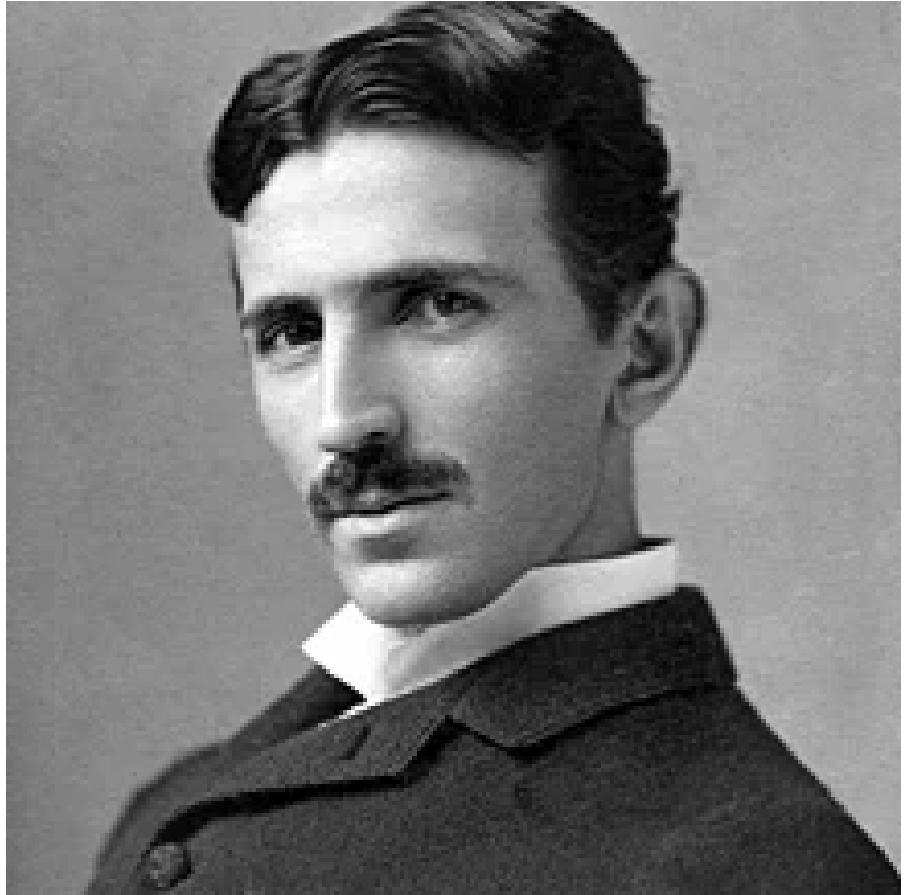

Problem solving is the process of finding a solution to a specific issue or challenge by analyzing and evaluating potential options and determining the best course of action. It involves identifying the problem, gathering information, generating alternatives, choosing a solution, and taking action to implement it. The goal of problem-solving is to resolve the issue in an effective and efficient manner.

How Problem solving Works

Problem solving is a process that involves:

- Identifying the problem
- Gathering information
- Generating alternatives
- Evaluating alternatives
- Choosing a solution
- Taking action
- Reflecting and evaluating the process.

Nikola Tesla was a Serbian-American inventor, electrical engineer, mechanical engineer, and futurist who is best known for his contributions to the design of the modern alternating current (AC) electricity supply system. Tesla's inventions and innovations revolutionized the fields of electrical and mechanical engineering and contributed greatly to the development of modern technology.,

Problem solving
